Developer scaling Discord tools that power 76.8k+ communities and 17.3M+ members, while building Minecraft servers, indie games, automation systems, and full-stack web products.

WORK EXPERIENCE

Head of Operations at R.O.T.I.

May 2025 - Present

- Overseeing scaling and architectural decisions for a top-tier multipurpose Discord bot.
- Coordinating development and community teams to maintain high operations standards.
- Managing services across 76.8k+ communities reaching 17.3M+ members with a 4.98/5 rating.

Technical Lead at Overlab.in

Nov 2025 - Present

- Overseeing digital branding web platforms and coordinating a technical team of developers.
- Built, deployed, and currently manage Overlab's primary web infrastructure.

Community Manager & Lead Dev at Mr. Random

Feb 2021 - Present

- Led custom anti-cheat, team, and server infrastructure development.
- Managed India's largest 20-day Minecraft event with 60+ players and 1,000+ applicants.
- Managing a community with 38k+ members.
- Builder and developer for a #1 ranked Indian and world #8 most-voted Minecraft server.
- Developed 10+ custom Minecraft Java plugins.

Lead Python Developer at Orator

May 2022 - May 2023

- Developed a high-concurrency Text-to-Speech bot supporting 50+ AI voice models.
- Scaled bot distribution to 34k+ servers and 3.4M+ active members.

Founder & Lead Developer at Harmonium Craft

Jul 2021 - Mar 2022

- Founded India's most-voted modded survival Minecraft server.
- Managed and scaled services for 6k+ unique monthly players.

Additional: Managed custom gaming community events for creators Mythpat and Andreobee, and served as a community moderator at WEX Mobile.

FEATURED PROJECTS

Chick Chick Go

Tech: Godot, GDScript, WebGL

- Fast, cheerful arcade survival game built around quick movement, escalating pressure, and satisfying upgrade choices.
- Designed runs around dodging foxes, chaining corn pickups, and keeping each play session instantly readable and fun.

Holix

Tech: Godot, GDScript, WebGL

- Playful Holi website where users throw colored water balloons at any X profile picture in an interactive 3D scene.
- Built a viral event-style web game with movement, aiming, custom profile-image loading, and restartable scenes.

Minecraft-Discord Voice Verification

Tech: Java, Python, MongoDB

- Real-time cross-platform sync system connecting Minecraft servers with Discord voice channels.
- Built a Python Discord bot and Java Minecraft plugin that automatically manage access based on live voice channel status.

Mehul Sen Portfolio & Store

Tech: Python Flask, Supabase, GSAP, Cashfree API

- Designed and developed a premium portfolio website for Mehul Sen, a leading Indian video editor.
- Added a custom digital store with accounts, secure Cashfree checkout, payment verification, and protected asset downloads.

SKILLS & TECH STACK

Languages: Python, Java, JavaScript, TypeScript, GDScript, C#
